

WHITEMORE

FIRE CONSULTANTS, INC.

Whitemore Fire Consultants, Inc. is pleased to announce the acquisition of Matterport® to assist both our staff fire consultants and clients in documenting fire/explosion sites. Matterport® is the standard for 3-D space capture. The all-in-one platform transforms real-life spaces into immersive digital twin models. This system allows us to create both 2-D and 3-D imagery of any scene.

We are excited about implementing this process into our everyday investigations. Please feel free to contact our office and/or staff investigators for more information.
